

Field Service Environmental/Scientific Instrumentation Technician

Full-time, Rockhampton QLD

- High-tech company specialising in environmental monitoring solutions
- A rare opportunity to join a global leader
- Excellent salary package and benefits

At Ecotech, we believe together, we create solutions that shape the future. We do this by working with our customers to provide bespoke solutions by designing, manufacturing, operating and supplying sophisticated monitoring equipment. www.ecotech.com

As an experienced Field Service Technician, this is an excellent opportunity for you to utilise your sound technical knowledge and further develop your skills. Ideally, your experience will be from an electronic/scientific instrumentation background where you have proven yourself by demonstrating strong troubleshooting skills.

In this role, you would be responsible for maintaining air pollution monitoring equipment and will be exposed to a variety of different measuring technologies. To be successful you would be comfortable working on various electronic instruments, calibration equipment and will also have experience with data logging and telemetry.

There will be an initial training period in our Brisbane branch after which the position will be based in Rockhampton with company provided accommodation and vehicle. There will also be travel throughout Queensland and occasional interstate and overseas travel.

Typically, you will to demonstrate a high degree of self-sufficiency and the ability to independently troubleshoot a variety of measurement systems. As much of the work is NATA accredited, diligent and thorough record keeping is an essential part of this role.

Key responsibilities include:

- Coordinating and planning of scheduled and unscheduled operations and maintenance service visits
- Providing high level technical support to customers
- Performing maintenance procedures on environmental monitoring systems as required
- Performing installation and commissioning tasks on new monitoring systems as required
- Technical trouble shooting

Qualifications, skills and experience:

- Relevant tertiary qualifications (TAFE certificate/diploma or equivalent)
- Previous related experience such as ambient air quality and particulate / dust monitoring and environmental instrumentation would be highly regarded
- Instrumentation background and/or suitable mechanical and electrical skills
- Experience with industrial communications protocols
- Sound level of computer literacy
- Demonstrated ability to follow instructions and work with minimal supervision

ACOEM Group

- Excellent customer service skills
- Demonstrated ability to communicate effectively and work collaboratively in a team
- Precise, accurate and diligent record keeping skills

If you have the relevant qualifications and experience, please submit your resume and covering letter to hari.gomatam@ecotech.com

Ecotech is an equal opportunity employer
