PROBLEM SOLVED

**AUSTRALIA'S ENVIRONMENTAL
MONITORING LEADERS OPEN
GLADSTONE BASE, SERVING
LOCAL INDUSTRY.**

No longer will Gladstone's major mining and industrial operations have to look to Brisbane for world-class Environmental Monitoring solutions. Aussie firm, and global player, Ecotech has opened a base right here in Gladstone.

Known for their problem-solving expertise, Ecotech are the leaders in their field, offering every kind of environmental monitoring to every kind of industry. Having pioneered air quality monitoring in Australia nearly four decades ago, the firm has grown into a trusted partner in everything from blast monitoring and water quality analysis to compliance instrumentation and NATA accredited services. Their tailor-made solutions are relied upon by mining and industry right across Australia.

Previously, Ecotech's nearest physical presence was down in Brisbane, but with so much industry in the Gladstone region, opening here made perfect sense. Chris White, Queensland Branch Manager for Ecotech, is looking forward to showing how the company can rise to any challenge. "We turn technology into

solutions," says White. "But it's essential that technology remains reliable, ensuring our instruments and systems stay online, even in the most remote and harsh environments."

White is one of three senior Ecotech team members looking after the establishment of the Gladstone branch. The others are Northern Sales Manager Mark Neaves and Field Service Engineer Mohammed Roohi. All are looking forward to establishing stronger relationships with local industry. "Our determination to solve any issue, to protect work-forces, local communities and a business' reputation, is what sets us apart," says Roohi. "It's what wins us respect," adds Neaves. "And we're really looking forward to delivering everything Ecotech is known for right here in the Gladstone region."

Gladstone businesses who want to know more about Ecotech's Environmental Monitoring solutions can email Mark Neaves on mark.neaves@ecotech.com or visit ecotech.com.au for details.

**CHRIS
WHITE**

**Queensland Branch
Manager**

A qualified industrial chemist with 20 years experience in the field of air monitoring and instrumentation, Chris' high level knowledge of a wide variety of air quality instrumentation and reporting, and thorough understanding of State and National legislation pertaining to air quality monitoring means he can offer the best solution to any problem.

**MARK
NEAVES**

**Northern Sales
Manager**

A systems engineer specialist, Mark is an expert in the integration and servicing of a wide variety of environmental and general monitoring systems including automatic weather stations, water monitoring stations, custom instrumentation systems and the integration of these into pre-existing networks.

**MOHAMMAD
ROOHI**

Field Service Engineer

Mohammad Roohi holds both a Bachelor of Science and a Master of Science in Chemical Engineering and carries over 15 years of experience in environmental monitoring across field operations, design, maintenance, quality assessments, analysis and reporting.
