

Media Release of 11 March 2016

Melbourne, Australia

For Immediate Release

Ecotech Pty Ltd, global leader and manufacturer in environmental monitoring solutions, will launch the latest innovation in ambient air environmental monitoring at ARABLAB – the international show for tomorrow’s technology – in Dubai from 20-23 March, 2016.

In recent months, nitrogen dioxide has been at the forefront of concerns for air pollution in cities worldwide. Authorities have been forced to take drastic measures, such as odd-even number plate days, green taxes, car-scrapping and ride-sharing programmes in an attempt to mitigate the problem. However, as urban populations, industry, vehicle ownership and transportation increase, the underlying issue is worsening.

James Agius, Ecotech’s International Sales & Operations Manager, expressed, “Ecotech will be unveiling a game changing technological advancement at ARABLAB that will address the very real concern of NO₂ pollution.”

Nicholas Dal Sasso, Managing Director of Ecotech, agreed, “Never has measurement of NO₂ been more important, or higher on the agenda, for environmental protection. As a leading supplier of air quality monitoring systems, we are proud to present the advancements in a key criteria gas measurement.”

Ecotech started distributing air quality monitoring analysers in the 1970s; today, Ecotech operates and manages over 370 real-time monitoring sites worldwide, every day. Ecotech’s global footprint includes 53 distributors, 2 manufacturing facilities and 9 branch offices across 80 countries. With extensive experience across varied high risk industry sectors such as mining, oil and gas and construction, Ecotech is recognised for customised, turn-key solutions – from design, manufacture, supply, operation and maintenance to data reporting services.

-----Ends-----

Background Information:

- Ecotech is NATA accredited for continuous monitoring of ambient air, meteorological monitoring, blast monitoring, calibration services as well as industrial emissions (CEMS) monitoring
- 2011 - Ecotech wins Governor of Victoria Innovation Excellence Export Award

- 2013 - Winner of the Australian Export Awards
- Ecotech has expanded its territory across 80 countries through 53 distributors, 2 manufacturing facilities and 9 branch offices.
